

The "kursi santai" relax chair set

The kursi santai relax chair set is designed by Singgih S. Kartono. It consists of two relax chairs and one side table. The set is made of fine teak wood from state plantations.

The santai relax chairs, sedan and jengki, are inspired by classic Javanese chairs from the 50's. Santai reinterpreted the design language of the chairs, deriving new shapes from the Javanese alphabet "Hanacaraka".

The chairs transport the cozy mood on a veranda in Java in the afternoon, when the sun starts to set and the neighbors come out to mingle and rest. The fine contours of the wooden body are carved out by hand and the rattan-covered seat and backrest make new use of traditional weaving skills.

The cilik side table complements the two relax chairs. It comes with the special feature of a removable table top that can be used as a tray, while the base can be used as a footrest.

The kursi santai set - with its warm colors, natural materials and soothing shapes - enables you to create variable relaxed and creative spaces at home. If using the sedan and jengki chair together, friends and family members have the chance to choose one style and thereby express their personality.
